ICE CREAM PRODUCTION

Ice cream production in the United States in June was estimated at 74,440,000 gallons, the Crop Reporting Board reports. This is fractionally less than in June 1964, but is 2 percent more than the 1959-63 average for the month. The seasonal increase from May of 12 percent was the same as at this time a year earlier and the average of the 1959-63 period. The accumulative total production in the first six months of this year was 1 percent more than in the corresponding period last year and 6 percent larger than the 5-year average. Temperatures during June averaged below normal in almost the entire country. Areas showing temperatures normal or above were only the following: (1) most of the northern Pacific Region, (2) Maine, and (3) limited sections each in Texas, Oklahoma, the Middle Mississippi and Ohio Valleys, and Pennsylvania.

Compared with June 1964, the North Atlantic States showed the only decrease in ice cream production: 4 percent. Production was up 3 percent in the East North Central Region and 1 percent in both the South Atlantic and the South Central. Output was about the same in all the other regions. Production was unchanged also in Pennsylvania, but was down 8 percent in New York and 1 percent in California. In the North Atlantic Region, increases were shown only in Massachusetts and Connecticut. Production was larger in all East North Central States except Indiana.

Compared with the 1959-63 average for June, production was more in all regions except the North Atlantic, where it was 2 percent less. Production was 5 percent larger in the South Atlantic States and 9 percent greater in the Pacific. Increases of 3 percent were shown in all the remaining regions. Output was 3 percent less in both New York and Pennsylvania, but was 10 percent more in California.

Revised ice cream estimates, by states, for January-May 1965 are shown on page 5. Enumerated data for 1964, by states and months, will be available about July 30 in annual release "Production of Manufactured Dairy Products" which may be secured upon request to this office. All U.S. totals include production in Alaska and Hawaii.

ICE MILK PRODUCTION

June production of ice milk in the United States totaled 27,460,000 gallons, the Crop Reporting Board reports. This is 3 percent more than the June 1964 enumeration and 34 percent greater than the 1959-63 average for the month. Output in the first half of this year was up 6 percent from the 1964 aggregate and 42 percent from the 5-year average.

The seasonal gain in production between May and June was 11 percent this year, as against 15 percent in 1964 and 16 percent in the 1959-63 period. Seasonal advances occurred in all regions of the country. Compared with June 1964, output was more in all regions except the West North Central and the South Central, where it was less.

SHERBET PRODUCTION

Production of sherbet in the United States was estimated at 5,065,000 gallons in June 1965 - 8 percent smaller than in June 1964 and 4 percent less than the 1959-63 average for the month. Cumulative output January through June this year was 1 percent less than in the first half of 1964, but 5 percent more than the 5-year average for these months.

Production increased 10 percent seasonally from May to June, compared with 21 percent at this time in 1964 and the 18-percent average in the previous 5-year period. Seasonal gains occurred in all regions except the Mountain. Compared with June 1964, output was less in all regions except the Pacific, where it was slightly more.

"MELLORINE-TYPE" FROZEN DESSERTS PRODUCTION

Mellorine production in the United States in June was estimated at 5,325,000 gallons. This is 3 percent less than the enumerated output in June 1964, but 3 percent more than the 1959-63 average for the month. Total manufacture in the first half of 1965 was up 1 percent from the corresponding period in 1964 and 9 percent from the 5-year average.

Production advanced 8 percent from May to June, compared with 13 percent a year earlier and 11 percent on the average in the 1959-63 period. Seasonal gains occurred in all states except Illinois, South Carolina and Alabama. Compared with June 1964, output increased in South Carolina, Louisiana, Oregon and California. Production was unchanged in Montana. Decreases occurred in all other producing states.

WATER ICE PRODUCTION

Water ice production in the United States at 5,920,000 gallons in June is 4 percent less than in June 1964, but 1 percent more than the 1959-63 average for the month. The January-June output was 1 percent lower than in the first half of 1964, but 5 percent larger than the average for the period.

Production increased only 11 percent from May to June, compared with 21 percent at this time in 1964 and 19 percent in the 1959-63 period. Seasonal advances occurred in all regions except the South Atlantic. Compared with June 1964, output decreased in all regions except the East North Central.
